

Notify@Once

BY USA MOBILITY

NEED TO NOTIFY LARGE GROUPS WITH IMPORTANT ALERTS?

Notify@Once speeds delivery of your priority communications by interconnecting all mobile messaging devices – pagers, cell phones, PDAs – with all network PCs into a single, powerful network.

When time is of the essence, Notify@Once enables you to send the same critical message to all group members by initiating a single message from the Notify@Once desktop interface OR a mobile device.

Plus, Notify@Once operates on a secure backbone with easy-to-use desktop and web interfaces, enabling the secure delivery of your mission-critical data.

MAKING EMERGENCY RESPONSE **FASTER**

WWW.USAMOBILITY.COM

» **Mass Notification Alerts**

Reach your entire organization by initiating a single message, even from a mobile device. Supports any SMTP-addressable device – e-mail, cell phone, pager, or PDA.

» **Custom Groups**

Create workgroups or teams on a situational, as-needed basis, and send group messages from a web interface or directly from a mobile device while in the field.

Group members can administer their own profiles and choose to receive messages on any or all of their devices.

» **Critical Reliability**

Hosted solution provides peace of mind in case primary systems are interrupted, plus message verification and archiving.

» **Ready to Go**

Works with existing equipment and devices. No need for costly infrastructure improvements. Low monthly fee per user; easy set up and use with centralized administration and full customer support.
