

E-Mail Messaging FAQ's – YAHOO MAIL

USA Mobility subscribers Yahoo! Mail accounts* can keep track of important e-mail messages by forwarding incoming messages to their wireless device while they are out of the office. Please note that Yahoo! Mail currently forwards up to 300 characters per message. Following are step-by-step instructions to forward e-mail to your USA Mobility wireless device.

Step 1: Register Your Wireless Device

Step 2: Define Messages to Forward

Step 3: Finalize New Rule

* Please direct any questions about the features of your e-mail service to your e-mail provider.

Step 1: Register Your Wireless Device

To forward incoming messages from your Yahoo! Mail account, you must first register your wireless device with Yahoo! Mobile.

1. From your Yahoo! Mail "Inbox" go to the "Options" section and select "Filters".
2. From the "Filters" page select "Register you device" or "Edit/Add New Devices" if you have previously registered a wireless device with Yahoo! Mobile.
3. Select "Alphanumeric pager" from the drop down menu.
4. "Enter Device Settings" to name your wireless device for easy reference, determine number of characters to forward, and the number of messages to forward each day.
5. Enter the e-mail address for your wireless device. Your wireless device e-mail address is one of the following:
 - 10digitphonenumber@my2way.com (Legacy Metrocall)
 - 10digitphonenumber@airmessage.net (Legacy WebLink Wireless)
 - 7digitPIN or 10digitphonenumber *either* @archwireless.net or @arch.net

If you have questions about your wireless e-mail address or the e-mail features of your wireless device please call the phone number on your invoice and contract to speak with a Customer Care Representative.

6. Once you have entered your wireless e-mail address, hit the "Send" button and a confirmation code will be sent to your wireless device.
7. Enter the confirmation code that was sent to your wireless device and click on the "Verify My Account" button.
8. Your wireless device should now appear in the "My Mobile Devices" window. Click the "Finished" button and then the "Save" button to proceed with setting up filters.

Step 2: Define Messages to Forward

1. From the "Filters" page click on the "Create" button to create a new filter.

2. Set the filter parameters to determine which messages should be forwarded to your wireless device. Only messages meeting all criteria of the filter will be forwarded to your wireless device.
 - In the "From header" field enter the e-mail address for anyone whose messages should be forwarded to your wireless device.
 - If you want to receive messages that were also sent to other recipients their e-mail address in the "To/Cc header" field.
 - In the "Subject" field, type a word or phrase that should be contained in the Subject of messages forwarded to your wireless devices.
 - If you want messages forwarded that contain certain words or phrases in the body of the e-mail messages, enter the words or phrases in the "Message Body" field.
3. Select the folder to forward messages to from the drop down menu, inbox is the standard folder to forward messages to.
4. Click on the box next to "Forward to my Wireless Device" to forward all messages meeting the criteria of the filter to your wireless device.

Step 3: Finalize New Rule

1. Click the "Save" button to save the filter settings you created. The new filter will now appear on the "Filters" page.
